

TABLE OF CONTENTS

1 INTRODUCTION	
1.1 Purpose of the thesis.....	1
1.2 Thesis structure.....	2
1.3 Personal research publications	4
2 STATE OF THE ART ANALISYS	
2.1 Preface to the state of the art	7
2.2 The traditional Economic Order Quantity Model EOQ	8
2.3 Review methodology and descriptive analysis	12
2.4 State of the art and classification framework	17
2.4.1 Deterministic models	20
2.4.2 Stochastic models	27
2.4.3 Fuzzy models	28
2.5 Citation network analysis	28
2.6 Background considerations for a future research agenda.....	36
2.6.1 Keyword implications	36
2.6.2 Transportation cost considerations in inventory replenishment decisions	38
2.6.3 Sustainability issues in lot sizing literature.....	40
2.6.4 Methodological developments analyzing cash flows related to inventory	43
Appendix I.....	46
3 THE NEW SUSTAINABLE LOT-SIZING FRAMEWORK	
3.1 First considerations.....	51
3.2 The new methodological approach.....	52
4 A NEW APPROACH FOR INCLUDING ERGONOMIC PRINCIPLES INTO EOQ MODEL	
4.1 The social impact of Lot-Sizing decisions in terms of Ergonomics.....	59
4.2 Literature review and regulations on Ergonomics	60
4.3 Modeling the economic impact of the SKUs	65
4.4 A multi-objective approach for Ergonomic Lot-Sizing	68

4.4.1	First step: sustainability considerations in the in-house problem.....	69
4.4.2	Second step: the ergonomic order quantity of in-bound materials.....	72
4.4.3	Model application	76
4.5	Ergonomic lot-sizing model with a direct costing approach	81
4.5.1	Case studies	86
	Appendix II	93
5	ENVIRONMENTALLY SUSTAINABLE LOT-SIZING MODEL AND MONETARY INCENTIVE COMPUTATION	
5.1	The Environmental problem in the modern global purchasing scenario	97
5.2	Theoretical background	98
5.3	Including environmental impact into Lot-Sizing.....	99
5.3.1	Mathematical formulation	100
5.3.2	Monetary incentives definition	106
5.3.3	Model application	110
5.3.4	Parametric analysis	113
6	HORIZONTAL COLLABORATION TO ACHIEVE SUSTAINABILITY IN MATERIAL PURCHASING	
6.1	The “Haulage Sharing” approach	121
6.2	The models: individual planning vs haulage-sharing	123
6.2.1	Generalization of the cooperative model to n partners.....	126
6.3	New three-step methodology and numerical applications.....	128
6.3.1	Numerical applications of the Haulage sharing approach	128
